MAY VOTE ON RAILWAY PROBLEM

ELECTRIC CHAIR FOR KILLER

SOUTHERN CALIFORNIA QUAKES

GREAT BEAR MOVEMENT STARTS

OTTAWA—There would be no annexation of the Canadian National and Canadian Pacific railways under the government's railway legislation, Premier R. B. Bennett asserted today. He said he would not support any measure to eliminate any doubt that might exist in this respect.

The prime minister said he had often thought of the possibility, at the next election of submitting the matter to a plebiscite of the Canadian people.

Heartfully shouting his unconcern and defying the crowd, Giuseppe Zangara, the assassin who tried to kill President Roosevelt, was sentenced on March 10th to die in the electric chair for the murder of Mayor Anton J. Cermak of Chicago.

"You are a cross man, too," Zangara screamed at Circuit Judge Uly O. Thompson, after sentence was pronounced. "I am afraid. You one of the capitalists. Put me in electric chair."

Under Florida law, Zangara must be taken to the state prison farm to pay the penalty for his mail set in Ray Front Park in February. Governor Scholtz must fix the week when Zangara is to die. L. F. Chapman, superintendent of the state prison farm will name the day or days in the meantime after Zangara is taken to Raiford, he must, under the law stay in the death house five days.

LOS ANGELES—Violent earthquakes continuing three hours after the first shock of death and destruction struck early on Friday night added confusion to a scene of increasing damage and terror to all southern California.

At 5:50 o'clock Pacific standard time, the toll as reported from most authentic sources available reached 119 dead and more than 4,600 injured.

The isolation of Long Beach continued almost complete, but reports from persons arriving from the beach area indicated mild flashes and terror-inspired rumors of hundreds or even scores being dead in that city were without foundation.

The path of death stretched from Santa Ana to Long Beach and Los Angeles.

Seasonal movement of men and supplies into Great Bear Lake mining area for summer activities has been started, according to word from the north. Aeroplanes have been freighted supplies in constantly.

It is expected that 1500 will be on the properties working various operations before the season is very far progressed.

A party of seven prospectors and

The Carbon Chronicle

CARBON, ALBERTA, THURSDAY, MARCH 16, 1933

SECRETARY-TREASURER OF VILLAGE OF CARBON SINCE 1912

Secretary-Treasurer of Carbon School District Since 1912

At the first meeting of the 1933 Village council, held last week, Alex Reid was appointed to the position of Secretary-Treasurer for the year. With the termination of this year Mr. Reid will have concluded twenty years of active service in this position, he having been appointed secretary-treasurer in 1913, two years after the Village of Carbon was incorporated.

While Mr. Reid has been secretary-treasurer of the Village for almost 20 years, he holds a record of even greater service—that of secretary-treasurer of the Carbon School District. This district was formed in 1912 and Mr. Reid was the first secretary-treasurer and has been the only secretary of the Carbon school district has ever had. He was re-appointed to this position for the year 1933.

On a motion the dues for the year 1933 were set at \$1.00, the amount set by council, and depend on local co-operation to make up the balance needed to carry on.

The following resolutions were passed:

That whereas many farmers do not secure the 4¢ rebate on gasoline used for agricultural purposes, because of the six months time limit, therefore be it resolved that we request the Provincial Government to extend the time limit to at least one year from the date of purchase.

The above resolution reads—

Whereas members of this local have used the East Crest gas for tractor purposes and found it unsuitable for tractor work and that it was too light and frothy; therefore be it resolved that we request the central office to secure their gas, etc. from the north end of the field, as we believe that if a suitable gas is procured a much larger sale can be found among farmers.

The former resolution reads—

We, the undersigned members, we will have to very greatly increase our membership to enable the central office to carry on its good work for the farmers.

The next meeting will be held on Saturday, March 25.

L.H. RAIFORD, Secretary

BE LOVAL

There are still a few local orders for printing being placed out of town and which are brought to our office from time to time. Be fair with your local concerns. Give them first choice in your order.

It will be able to weather the times, and when the tide turns we will be able to supply each other wants.

With the opening of spring and the warmer weather we will see an influx of peddlers in every line. Do not patronize these outside agents. They give you nothing in return and in most cases, do not even guarantee their products.

This is quite true of printing salesmen, and they will be making the rounds of stores and Village and municipal offices in the hope of picking up the odd job.

Mr. citizen! Do not grab at the bait offered by these high pressure salesmen. If you need anything they offer remember it and see your local concern first. They can offer you equally attractive prices and workmanship.

Should you not be able to turn down one of these high-caliber salesmen, you may not be lacking in business and public spirit. Tell them the truth—that there is a local dealer and you feel it is your duty to patronize him if patronize you.

And speaking of printing, that good old paragraph times three.

Remember! When the next printing salesman walks into your office and asks you for a printing order, tell him that there is a printer in town and that he CAN do that particular job.

THEY COMPANY intends to place ten men to do early work. This contingent will be shortly followed by eight more who will be kept busy until freeze-up next fall.

U.F.A. LOCAL NO. 63 FAVORS HALF YEAR MORE TO MAKE RETURNS

The Carbon Local No. 63 held a meeting in the Farmers' Exchange hall on Saturday afternoon, March 11th.

The meeting being called for the purpose of considering the Co-operative activities of the local for the year 1933, the accounting of which the secretary had obtained since the last meeting.

It was decided to pay any discounts coming to the U.F.A., first deducting their membership for the year 1933.

On a motion the dues for the year 1933 were set at \$1.00, the amount set by council, and depend on local co-operation to make up the balance needed to carry on.

The following resolutions were passed:

That whereas many farmers do not secure the 4¢ rebate on gasoline used for agricultural purposes, because of the six months time limit, therefore be it resolved that we request the Provincial Government to extend the time limit to at least one year from the date of purchase.

The above resolution reads—

TENNIS CLUB TO HOLD DANCE ON FRIDAY, MARCH 31

Final arrangements have been completed and posters are out announcing the Tennis Club Dance, to be held in the Farmers' Exchange hall on Friday, March 31st. The Rockyford Aerobics have been engaged to play the music and the tennis club members all attending a real time.

42/21 ALBERTA CAR HAVE BUT FOUR CYLINDERS

The majority of automobiles in Alberta are powered with four-cylinder engines. It is revealed in a survey recently completed. There are 47,421 of them.

The next largest number is comprised of six-cylinder cars, numbering 32,325.

There are 3,099 eight-cylinder cars and 22 twelve-cylinder cars.

And all of these cars consumed 40,000,000 gallons of gasoline last year.

There are 4,000 eight-cylinder cars and 22 twelve-cylinder cars.

Queer Facts in World News

BANK CRISIS ENDS BOTTLE HOARDING

The inventory which, circumstances of the banking holiday is becoming among some people can be obtained by grocers and milk men. Said a Boston grocer: "Bottle concerns have been trying to collect their bottles for years but many folks just let them accumulate in their homes. Now they are coming in—dozens at a time. Hoarded gold and hoarded bottles. What's the difference?"

HIDDEN TREASURE FOUND ON SHOES

DISTRIBUTION OF PLANTS, SEEDS

Old School of Agriculture is offering the following seeds and plants: One to four selections may be made and a membership fee of 50¢ must accompany order. Orders must be sent before April 15, and will be sent express collect.

Potatoes: 4-lb. Sample. 1 Vicks Dairy; 2 Netted Gem; 3 Irish Cobbler; 4 Bova.

Grasses: 5 Western blue grass, 1 lb. A promising annual hay grass. 6 Fine Western ryegrass, 5 lb. Improved hay strain.

7 Collection of Alberta grown vegetable seeds. 8 Collection of home grown flower seeds. 9 Collection of 6 perennial flower seeds.

10 Collection of 6 perennial flower seeds. 11 Perennia seedlings, 5¢. 12 Clematis seed, 1-¢ per seed.

Also a limited amount of the leading varieties of wheat, oats, barley and flax, but nothing artificially sown in the soil. Members interested are asked to write.

Only a limited supply of each class is available so some substitutes may be necessary.

High Commissioner's Office In London Sends a Warning Note About Cattle Export Trade

Too much importance cannot be placed upon the suggestions made in the following paragraph, which is a report based on a thorough investigation by the High Commissioner's office of the situation in respect to our export cattle trade, and the warning which we cannot afford to ignore is quite apparent in these paragraphs, which should be placed before every person interested in avoiding any action which might tend to jeopardize the development of our export cattle trade in Great Britain.

"It is now generally recognized that there has been an improved section of buyers for the export trade in recent years, and their popularity here has spread accordingly. Dealers and buyers are peculiarly sensitive to unsatisfactory conditions of excellence down to any shipment. The burden of returning a reasonably good price for common sorts of livestock imposes a difficult task, and consignees are being left with the trade, and are being urged them, diplomatically, to choose export cattle carefully for type, weight, age and conformation. But the she-cattle trade, being rather more diversified, leads itself to a more harassing experience than does the trade in steers.

"Our healthy heifers and cows have been talked of and written about frequently. There has been created an atmosphere of hopeful expectancy, the value of good type, weight and conformation, its place in the respective sections of the British trade ranks high, and this fact should be noted carefully by the Canadian shippers.

"It is not possible for forecast to be made or not to be made, but it is suitable for breeding and dairy purposes, can be selected and shipped to advantage. That will be determined only by trial and experience. Strongly the trade demand for suitable stock is the more preferable and prudent policy; overfeeding it with common sorts, especially as the outlet, will stunt, and may even damn, a promising potential trade.

"The stock section in Canada for breeding or dairy purposes is in Great Britain, and lacking the characteristics fitting to the ideas and needs of the people specializing in these particular activities, will not find buyers, except at uneconomic prices. Experience of this sort will give Canadian producers a strong impression to uneconomic prices, a wrong impression in Great Britain of the value and usefulness of our stock, a condition that will cost producers and shippers considerable money, and one that will be difficult to correct. The same will apply to their steers going into new areas.

"Such a result, if it were possible to forecast, should not be risked or permitted. Even extensive trade to safeguard the new trade, and the new opportunity, could be justified. Furthermore, I misjudge the trade here if they would not support concentrated action, at the outlet, to attain this desirable objective.

"For the general guidance of shippers who are considering the possibilities of serving the dairy industry with either heifers or springer cows, freshening three or four weeks after landing, the great majority of the dairy farmers prefer a good size animal, which, of course, should possess milking qualities and conformation. The breeds most favored are cross Shorthorns or crosses out of Holstein and Ayrshire by a Shorthorn bull. Pure bred Ayrshires or Holsteins are not favored unless they are of the first class. The dairy farmer's trade and size is what dairymen have in mind.

"One dealer suggests that: 'Shippers should give the fullest information as to probable dates of calving; what kind of soil produces the calf; and what age the cow is—whether first, second or third calf. We would recommend cows about four to five years old, carrying second or third calf. First calf cows would not sell well, owing to the prospect of smaller milk volume during first calf period.' 'The first choice in Scotland for buyers for best breeding purposes is well bred Angus or their crosses. Shorthorns are second. Herefords are third, popular in England, the Hereford takes a better place.

"Realizing and sustaining profitable results in building our cattle business will depend upon the attitude on the direction and conduct of the

Initial efforts in the new field of markets.

"Common sense should convince us that the points made in the above paragraphs are well taken, and that any overzealous precaution in respect to volume and quality of cattle exported to the United Kingdom, if however, further proof is necessary, nothing could be more appropriate than the following statement from a letter dated February 17th from the Animal Products Trade Commissioner in London to the Dominion Live Stock Branch, Ottawa, in respect to a recent shipment sold at Birkenhead.

"The cows, whether or not they are intended for slaughter or milking, are unsuitable for other purposes. None of the buyers was willing to the extent of tendering a bid, and what was left with the sale of such animals is that they are left with the consignee until he commences to feel that the costs to the shipper for holding the cattle are accumulating out of proportion to the chances of getting a satisfactory price, and that the cattle are unsuitable for the meat trade there is a sale is concluded mostly at the buyer's figure, and for the very good reason that, although they are unsuitable for the meat trade there is, nevertheless, no alternative outlet.

"Adding conviction to conviction, we would be very foolish to put the cost of shipping on common cattle. It costs just as much to ship and sell a lot of common cattle as it does to ship only well bred cattle in good condition."

"You may advise any inquirers that rough cattle are not wanted, and it would be very foolish to put the cost of shipping on common cattle. It costs just as much to ship and sell a lot of common cattle as it does to ship only well bred cattle in good condition."

Learning To Fly

Mexican Tree Frog Can Drop Slowly From Great Heights

A Mexican tree frog is described by Dr. Remington Kellogg, of the United States National Museum. This frog, he says, has elongated hind legs well adapted to jumping, and has been known to leap and alight without injury a height of 140 feet. Dr. Kellogg has conducted a number of experiments to test its powers of flight. When he dropped one from a high water tower he said it immediately spread out its limbs and sailed down slowly at an angle, landing uninjured about ninety feet away from the base of the tower. There appeared to be no further acceleration after the frog alighted about twelve feet, he said. At other times, Dr. Kellogg has tried throwing these frogs into the air. Each time he did so, he said, they were managed by violent struggling to get into a balanced position and glide to the ground unharmed.

Large Tree Mug Ben

Far-famed "Big Ben" has been eclipsed in size by two other clocks in London. First an old penny clock on an office building surpassing "Big Ben" in size, and now a company manufacturing medicines has put up a still larger one over Trafalgar Square.

Americans purchase \$300,000,000 worth of fraudulent stocks each week.

WIND AND STORM SWEEP LINER ON TO SANDBANK

Above us goes the trans-Atlantic liner "Montrose" being pulled off a sandbank on Arkley Spit, near Liverpool, but all the passengers had been rescued and taken to Liverpool. The "Montrose," for more than two days buffeted by wind and storm, was only one hour from her destination when the high wind proved too much for her and she was forced high and dry on the treacherous sandbank. Fortunately no damage was done to the liner and the passengers suffered very little inconvenience.

Plenty Of Reading Matter

Convincing In Canadian Prisoners Supplied Books and Periodicals

Whatever he may lack in the apportionment of his life, the convict in a Canadian penitentiary need not go without his reading. A bulletin of the Dominion Bureau of Statistics makes this plain. In our seven penitentiaries at the time this survey was made, there were 2,748 convicts, and in the seven libraries were 48,342 volumes; to say nothing of an average of 54 periodicals. The expenditure per prisoner for books and periodicals was \$1.61 in 1921.

The largest library is at Kingston, where 19,665 volumes are at the disposal of Col. McLaughlin's "guests," or 24 per person. The smallest is at New Westminster, B.C., where there are only seven books per man.

These statistics are interesting, but they leave the best part of the story untold. One should like to know the extent to which prison libraries are used by convicts, the cost of reading done in the penitentiaries. Is fiction the favorite, and what type of fiction? Is there much serious and sustained effort at mental improvement through technical and instructive works? Do prisoners fancy the detective story? Do they prefer romance with a happy ending?

Probably their tastes are about as sane as those of any equal group of men outside the walls. —Ottawa Journal.

Novel Device For Students

Signal Censures Tardy and Welcomes Punctual Ones At Lectures

A novel device for welcoming students to lectures and censuring tardy ones has been introduced by Dr. G. M. Shrum of the department of physics, University of British Columbia.

A "welcome" sign, vividly outlined in green neon, greets each entry to the lecture room; and an automatic counting machine registers the attendance. Late-comers, however, are reminded of the fact by the ringing of bells and the sign "Late again."

The signal changes are controlled by the professor behind his desk.

A beam of invisible ultra violet light, which is cut by each student as he enters the room, is the basis of the invention. The effect of the interrupted beam of light on a photo-electric cell causes the ringing of bells and the counting of each entrant.

Sense Of Humor Left

And Most Western Farmers Still Possess Their Optimism

The National Review Review gives the following as the answer made by a prairie farmer to an income tax inspector who enquired about his income over a period of years:

"You asked about my crops for the last five years; well, I'll tell you. In 1924 I was dried out; in 1925 I was laid up; in 1926 I was frozen out; and in 1927 I just waited out. I'm still out."

Notwithstanding all this, farmers seem to have retained his sense of humor, and as he is a westerner, we are also willing to state that he continues to possess an abundant stock of optimism. —Brooklyn Recorder and Times.

Soap should never be used on white silk. It should be dissolved in water before laundering is begun.

Chinese Women Going Through For Medicine

Large Percentage Of Students Eager To Become Doctors

Dr. Josephine Carver, Lawyer, of Shanghai, was the only woman doctor elected to fellowship in the American College of Physicians last year. She is dean of the hospital of the Women's Christian Medical College in Shanghai and all her staff are Chinese. She trains young men and women as doctors and nurses and oversees a hospital of more than 200 beds.

Interviewed at Montreal when she returned the annual clinical session of the American College of Physicians Dr. Carver said: "It is interesting to learn that more than 19 per cent of Chinese women students at American colleges. Chinese women are marvelous students. Far more eager to learn than their western sisters."

"In their country traditionally a scholar rates very high and as the background of Chinese life is philosophy they are intrigued and interested in science, which is completely new to them. They acquire the English language so they may study. They retain Chinese dress as more becoming. They take up medicine because it is so much useful. A Chinese student or doctor is on the same footing with a man. Her learning makes her his equal."

Dr. Carver will spend one year on this continent to learn the latest discoveries in medicine and then will return to the east.

Lack Of Phosphorus Causes Tooth Decay

According To Results Of Experiments By Dr. Agnew

Tooth decay is primarily due to lack of phosphorus and Vitamin "D" in the diet, according to the results of experiments made by Dr. G. Gordon Agnew of the West China Union University. Working with hundreds of laboratory animals, Dr. Agnew was able to produce tooth decay in practically all the cases by depriving them of these two food elements.

Eating sugar, candy and other sweets, it was further indicated by these test diets, has no effect in itself in causing tooth decay, except that by satisfying the appetite too quickly it tends to keep down the intake of the foods which contain the elements which do make for sound tooth structure.

Dr. Agnew says that among the Chinese tribes, in particular, where tooth decay is especially infrequent, while their diet is highly restricted, the eating of whole corn, an important article of their daily food, supplies them with adequate phosphorus while their out of door life in the sunshine assures them of plenty of Vitamin "D."

A very recently-looking old man presented himself at a hospital for cats and dogs, and asked to be taken in.

"Oh, yes, I can't come in here," he was told.

"Oh, yes, I can," he protested. "I'm an old soldier."

"But, my good man, you can't. This is a veterinary hospital."

"That's right," answered the old man solemnly. "I'm a veteran."

Value Of Life Insurance

Interesting Statement Made By Hon. Charles A. Dunning

Hon. Charles A. Dunning, former Canadian finance minister, made an interesting statement with respect to life insurance in his annual address as president of the Ontario Equitable Life when he said: "Life insurance as an institution is at once the greatest debt and the greatest creditor in Canada; the greatest Canadian debtor because its contracts to pay are larger in volume than any other in our national structure; the greatest Canadian creditor because it has accumulated in small amounts with respect to the five million lives insured over two and one-quarter billion dollars, which it has loaned to governments, municipalities, school districts, railways, utilities, industries, our own politicians, and also on mortgage."

—Toronto Star Weekly.

How To Eat Oysters

Prince Of Wales Receives Pointer From An Authority

"What is the proper way to eat oysters?" asked the Prince of Wales recently, when seven-party oyster tasters fresh from their native bays, were laid before him, at an oyster farm, "should you take vinegar or red pepper, or both," he asked. The manager replied: "Never, sir, the best way is to 'eat them clean.' Then you got the true seawater flavor."

Newboys Are Quick

Can Tell Nationality Of Customers By Their Shoes

Americans occasionally when travelling in England like to be taken for Englishmen. One of this group, a Canadian, was in London, where he got himself a complete English outfit—suit, hat, linen, gloves, overcoat and cane.

While in the outfit, he walked out to the steps of his hotel and heard there a moment contemplating the reader. Just then a French lady came a block away, came clanking toward him, crying:

"New York Herald—here you are."

It was a number of foreign newspaper vendors in Paris who told the story of his skill in spotting the nationality of prospective customers by the shape of their shoes, said he.

Sometimes what seems a grainy business transaction has behind it the view of a country as a whole. Such was the case when the Department of the Interior, early in 1923, received from the Northwest Company, Limited, a subsidiary of Imperial Oil Limited, a cheque for the amount of the first royalty payable to the Government on the production of the Company's petroleum well near Norman in the Northwest Territories, nine hundred odd miles, as the Canadian geese fly, north of Edmonton. That slip of paper contained only ten or a dozen words, but how much of fact vindicated and work accomplished it revealed.

In 1921 the Northwest Company struck a hole of petroleum, reported at that time to be about at the rate of 100 barrels per day, in what is commonly called the Norman well, situated on the bank of the Mackenzie fifty-three miles below Norman. The well was completed in 1925 and as there was no immediate local use for the petroleum it was capped to prevent waste.

When it became clear that there was a considerable oil potentiality away down the Mackenzie between Great Slave Lake and the Arctic Ocean there was a lot of popular speculation as to what would be done about it. Common comments were that the oil was useless where it was and would never be brought to a commercial position. It was held that it would be out of the market until the southern wells went dry and even then the cost of production with its stream nine hundred miles or so thousands miles to rail head, or pumping it up hill through a pipe line for over a mile, was prohibitive.

Then came the aeroplane, and help came from the Great Bear Lake prospectors and their supplies were taken in from rail head in as many hours as it formerly took weeks, and were brought from localities of production at equal speed. Steamboats and tractor, canoes and dogteams were in use, too, but it was the aeroplane which carried the master key to the doors of the North.

The mineral deposits about the east end of Great Bear Lake were discovered, development began, and there was a demand for gasoline and oil, and Great Bear Lake supplies into the Mackenzie River through Great Bear River, at the mouth of which latter Norman is situated. The Norman source in 1922 was, therefore, comparatively speaking, next door to its customers, with water transportation for the oil, and a portage around a stretch of rapids in the Great Bear River from the well to the east end of Great Bear Lake. The Northwest Company, which had brought in a small refining plant in 1921, opened this up in the spring of 1923 and supplied gasoline and fuel oil for running motors and Diesel engines in the mining camps. It was upon this production that the royalty was paid, and while the oil had not been relatively small this commercial use of northern oil in both a fulfillment of well grounded predictions of ten years ago and a promise of greater things to come.

Good Stories Being Spoken

Now it is the story of Dick Whitcomb that is being mangled by the "Debutants." It appears Dick did not own a world class cat, that he carried well off, was not obliged to leave home, and that consequently he never heard the cat to turn tail and the Lord Mayor of London. At this story business continues, and the picturesque figures of an early day will be left. —Toronto Globe.

U. S. PRESIDENT HAS EXTENDED BANK HOLIDAY

Washington. — By proclamation, President Roosevelt extended the modified United States banking holiday indefinitely, exercising the powers conferred upon him by congress in emergency banking legislation which had signed earlier.

The chief executive also proclaimed an extension of the embargo on gold.

All the provisions of the proclamation were continued in full force and effect. This meant also a renewal of the ban on hoarding.

The proclamation is to remain effective until ended by another proclamation.

"The national emergency still exists," read the decree, "and it is necessary to take further measures extending beyond the emergency period to accomplish such purpose intended by the original proclamation of Sunday."

The president said, "All the terms and provisions of the March 3 proclamation and all regulations issued thereunder continue in full force and effect."

It is understood the purpose is to give the secretary of the treasury further time in which to submit the emergency banking law enacted recently by congress which would have permitted immediate reopening of sound banks.

Congress placed in President Roosevelt's hands the legislation he had asked to meet the United States banking emergency.

Final congressional approval came with passage by the senate after three hours' discussion which developed a bitter exchange between Senators Glass of Virginia, and Long of Louisiana. The latter contended the measure offered inadequate protection to small banks.

Earlier, the House had approved the measure with only 40 minutes debate, attesting the speed with which congress was functioning to meet the banking emergency.

The senate vote, by roll call, was 73 to seven. House action was unanimous.

Cut Hollywood Salaries

Motion Picture Producers Feel Financial Pinch

Hollywood, Cal.—Cessation of all activities at all motion picture studios in Hollywood was ordered early today by the Association of Motion Picture Producers unless drastic cuts in salaries and wages were made within a period, due to the banking situation, were taken by all employees and artists.

For salaries more than \$50 weekly, or cut of 50 per cent, for the eight-week period would be made with a minimum salary of \$37.50 established. Those earning less than \$50 weekly would take a 25 per cent cut with a minimum of \$15 a week. The cuts would be retroactive starting March 4.

Must Pay Legal Costs

Haitian Lawyer Awarded Judgment Against Vergia

Haitian, N.B.—J. J. Power, K.C., Haitian lawyer who argued in supreme court on behalf of Peter Vergia, has been awarded a judgment of \$601 against the Dunkhoffer leader. Costs of \$35 were added to the amount by Judge W. J. O'Hearn in his decision.

Shortly after Vergia was freed from the threat of deportation to England, litigation was opened on Mr. Power's bill.

It is understood a settlement of the account will be made with little delay.

Break Up Parade

Vancouver, B.C.—A parade of several hundred women and some men who planned a demonstration in front of the city hall, was broken up and the participants dispersed by police. One man, Gus Christman, was struck on the head by a police baton when the melee and was removed to hospital for treatment.

Purchasing Radio System

Ottawa, Ont.—The Canadian radio broadcasting commission will purchase the radio broadcasting system of the Canadian National Railways. It was understood the sale would consist of three stations in Vancouver, the others in Ottawa and Montreal, N.B.

W. N. U. 1983

Board Of Censors

Plan To Form Joint Board in the West
Edmonton, Alberta.—Alberta is requested to join in forming a joint board of censors in the western provinces in a bill to amend the Theatres Act introduced in the legislature by Premier J. E. Brownlee.

The proposal to create a joint board of censors for the west was made first in October, 1931, at an inter-provincial conference in Calgary. It was understood the plan was approved by all the provinces except British Columbia.

The proposal came up again at the inter-provincial conference in Winnipeg this year and with introduction of such a bill in the Alberta legislature it is believed the prairie provinces plan to carry out the scheme. The bill also empowers the Lieutenant-Governor-in-Council to require a proportion of the films shown in Alberta be of British manufacture.

Vote Against Fighting

Victoria College Students Oppose Taking Up Arms For Country

Toronto, Ont.—Men and women students at Victoria College, by a majority of six, voted "that this house will not, under any conditions, fight for its king and country."

About one-fourth of the 1,034 students registered at the college attended the debate. About half of these were women. There were several unusual scenes. A white feather proffered by a girl student was enthusiastically accepted by several of the women. The League of Nations was termed "half-baked idealism" and a "ghastly failure." Pacifism was called "a damnable sin" by a co-ed.

Laws Should Be Uniform

Hon. R. J. Manion Advocates New Regulations For Truck Traffic

Ottawa, Ont.—Uniform regulations throughout Canada are needed for truck traffic in competition with railways. Hon. R. J. Manion declared in the House of Commons.

The railway minister indicated additional measures were being taken to make uniform the various regulations throughout Canada.

A questionnaire had been sent out, and when replies were received officials of the various provinces would probably be brought to Ottawa with a view to arriving at some equitable scheme of taxation and fixation of rates for the buses and trucks.

Consigned To The Sea

Four Hundred Gallons Of Pure Alcohol Dumped In Harbor At Quebec

Quebec, P.Q.—Four hundred gallons of pure alcohol, valued at approximately \$100,000 were sent to the sea by the Customs.

Officers of the Royal Canadian Mounted Police, on instructions from the Customs, poured the alcohol into the water of the Esqui-mault harbor.

The liquor was seized by the Mounted Police last summer on board the American-owned gasoline launch "Advance," which was captured in the Gulf of Georgia on its way to the mainland.

Aids Empire Products

Schedule Introduced In Australia House To Reduce Duties

Canberra, Australia.—A schedule reducing substantially the duties on 31 commodities from empire exporters was introduced in the House by Minister-Col. T. W. White, Minister of Customs.

The bill represents the first instalment of application of articles from the 1928 to 14 inclusive of the agreement of the imperial conference. The chief reductions included in the bill introduced recently are on wool, felt, fur goods, hats, socks, stockings, wireless goods and rubber, tanned skins.

Wheat Prices In France

Paris, France.—The price of wheat would be increased about 10 cents per bushel by a bill approved by the cabinet in which the price would be stabilized at approximately \$1.25 per bushel. Inferior wheat would be taken off the market and used for feeding.

Want British Destroyers

Canberra, Australia.—Prime Minister Joseph Lyons announces the Australian government is negotiating with the United Kingdom for replacement of destroyers in the Australian squadron by four destroyers of the latest type from the British navy.

Report Not Confirmed

Ex-Kaiser May Have Abandoned Claim To German Throne

London, Eng.—Any prospects of former Kaiser Wilhelm II seeking to regain the throne of Imperial Germany as a result of recent events there is stated to have been vanquished through the former sovereign's own act.

If the London Daily Mail's correspondent at Doorn, Holland, is accurately informed, Wilhelm II has completely and voluntarily abandoned the aim with which he has often been credited of again wielding power over his own people.

Instead he is reported seeking permission to spend his declining years in the privacy of his castle at Homburg Vor der Höhe, the famous military spring resort in Hesse-Nassau. He was 74 years old in January.

Any anxiety the ex-kaiser may have felt concerning the attitude of his son, Crown Prince Rupprecht, of claims to the throne were reported removed by a kind of confidant document of abdication. At a recent family council in Doorn, the sons were reported to have turned over all their "rights" to the throne to the ex-royal prince for his disposal.

Hit By Financial Crisis

Former Kaiser May Lose Money As Result Of U.S. Situation

London, Eng.—The former German Kaiser, Rupprecht, will be obliged to cut his household expenses as a result of the financial situation in the United States, the London Daily Mail's Doorn correspondent reported.

Wilhelm also was said by the reporter to be anxiously watching fluctuations of the Dutch florin, a fall in which would make him comparatively poor.

MARSHAL CHANG RESIGNS HIS POST AS COMMANDER

Peiping, China.—Thirty-five-year-old Marshal Chang Hsiao-Liang, who resigned as commander-in-chief of the Chinese army operating against the Japanese in the north, explained the government he considered himself unfit to command.

His resignation climaxed a long period of criticism of his administration of the Chinese defence forces, which, since September, 1931, have been almost steadily withdrawing before the Japanese. In a telegram to the Nanking government the young marshal said:

"After the loss of the three eastern provinces (comprising Manchuria), I tried my best to remedy my fault but to full of Jehol convinced me I am unfit to keep command."

Chang succeeded his father, the late Marshal Shiao Tzu-Lin, as war lord of Manchuria in 1928.

Peiping, China.—The arrest and execution of the Chinese general, Tang Yu-Lin, who governed the province of Jehol until that territory was taken over by the Japanese, was reported here today.

A reliable source said General Tang had been seized at Hsiao-Engkang, a pass through the Great Wall. Troops of Marshal Chang Hsiao-Liang, who has just resigned as the principal North China military commander, made the arrest, it was said.

A HAPPY PICTURE WITH A SAD ENDING

FIRST MATE BECOMES K.C.

The King has approved the appointment of Mr. Lewis Ward to be King's Counsel, Mr. Ward, in his youth, allied on liners between London and the United States. Being ambitious to be a barrister, he has risen to be a successful junior counsel in the Admiralty court and a Lloyd's salvage arbitrator.

The King has approved the appointment of Mr. Lewis Ward to be King's Counsel, Mr. Ward, in his youth, allied on liners between London and the United States. Being ambitious to be a barrister, he has risen to be a successful junior counsel in the Admiralty court and a Lloyd's salvage arbitrator.

Political Disturbances

Foreign Correspondents In Germany Face Expulsion Measures

Berlin, Germany.—Five persons were killed and several injured in political disturbances in four German cities.

In Breslau, one Nazi was killed and five wounded when shots were fired from trade-union headquarters against a group of 250 brown-shirted marchers.

Two Nazis were killed and six injured when a funeral procession in Düsseldorf was fired upon. In Wuppertal a Reichsbanner man was killed by unidentified assailants.

A Communist leader was found shot to death on a street in Duisburg, while a worker was seriously injured in his home by an unidentified person.

Foreign correspondents in Germany have been warned that expulsion measures are being prepared to apply to those who have "persistently mis-represented the international situation."

Discuss Railway Problems

Diverse Opinions Heard In Ottawa Debate

Ottawa, Ont.—Joint operation of the Canadian National and Canadian Pacific Railways was termed the only lasting solution to transportation problems, by Dr. Peter McInnis, Conservative, Muskoka, in the House of Commons.

From the other side of the House, Hon. Peter Hendry, former Liberal Minister of Labor, attacked the government legislation implementing the recommendations of the Duff commission on transportation on the ground it would establish exactly what Dr. McInnis advocated—joint operation of the railways.

To Help British Farmers

London, Eng.—Major Walter Elliot, Minister of Agriculture, introduced in the House of Commons a bill designed to re-organize British agriculture and bring prices of British farm products to a remunerative level. It would empower the government to protect organized markets by regulation of imports through quotas or other means, from any flood of overseas imports.

The bill is to authorize the provinces to permit the conduct of sweepstakes in their territories, not by any group of citizens, but only by a committee authorized by the attorney-general, who would direct the scheme. The money would be devoted to the welfare of the sick, the destitute and the maimed.

The bill expressly forbids the advertising of a sweepstake outside the province in which it is being conducted and the appointment of agents for the sale of tickets outside the province.

Senator MacRae said in 1931, the Irish hospitals received from the three sweepstakes, more than £2,000,000.

In 1932, according to a cable he received recently from Ireland three sweepstakes had gross receipts of £11,000,000. They gave away in prizes £7,000,000 and the expenses were £1,000,000.

As to the moral question involved, the churches in Ireland had voiced no disapproval of the holding of sweepstakes. After all church bazaars were the same thing on a small scale.

Senator MacRae outlined the serious situation of the hospitals and other charitable institutions in Canada. The Vancouver hospital had received £750,000 to the Irish, and had no money to pay it. Other institutions were in like predicament. He closed with an urgent plea for the passage of his bill.

Approves Financial Move

London Daily Mail Thinks Canada's Intention Is "Wise Step"

London, Eng.—The Daily Mail, Conservative organ, described the alleged intention of the Canadian government to ask parliament for extraordinary powers in the matter of financing as a "very wise and timely step."

"There are many factors," it continued, "which must operate strongly in Canada's favor. Her banking system is free from most of the weaknesses which brought difficulties elsewhere. She has not a multitude of small mutually competitive banks but a close co-operation between 11 large banks under the Bankers' Association."

The Daily Mail refers to the report the government would ask parliament to invest it with all the powers conveyed under the "peace order and good government" clause of war-time legislation. This clause would give the government power to adjust practically any measure, though necessary to the welfare and stability of the Dominion.

Tribute To Cermak

Chicago Citizens Pay Respects To slain Mayor

Chicago. The body of Mayor Anton J. Cermak lay in the downtown police station as Chicagoans gazed at their affairs at a show tent after according an impressive tribute to the man who rose from the slums to mayor.

But one floral piece adorned the casket—a spray of lilies sent by President and Mrs. Franklin D. Roosevelt.

The president, for whom the bullet that brought death to Chicago's chief executive was intended, was represented by a military aide, Lieut.-Col. Campbell B. Holden.

From the time bearing the funeral cortege arrived until the casket was disappeared behind the portals of the Cermak home, the citizenry observed a minute call.

The motorcade of official automobiles that followed, hearse through the Loop district, past Mayor Cermak's workshop, his city hall—and to his home on the northwest side, numbered 4100.

Containing more than 800 sections the bill will consolidate and modernize Canadian shipping legislation and will take the place of the part of the Imperial Shipping Act which now has effect in Canada.

Although Canadian-owned ships and tonnage are completely exempt from the Canadian-made law of the empire's mercantile marine fleet will be preserved. Canadian ships will be called "British ships of Canadian registry."

The bill was given first reading by the senate and will be studied by the committee on shipping and commerce.

Prior to the passing of the statute of Westminster, defining the complete legislative independence of the Dominion, Canadian ships outside Canadian territorial waters operated under laws enacted by the parliament of the United Kingdom.

Ottawa, Ont.—Sweepstakes for the benefit of charitable purposes would be legalized in Canada if a bill introduced in the senate by Senator A. D. MacRae, of Vancouver, becomes law. It is the Vancouver senator's second attempt to repeal Canada's ban on this type of large scale gambling. He introduced a similar bill last year, but failed to get it through.

Public feeling was now in favor of legalized sweepstakes, Senator MacRae said. In Vancouver 73 per cent of the voters at a plebiscite had approved government control of sweepstakes. The British Columbia Hospital Association had voted in favor of them and the Union of British Columbia Municipalities had endorsed the idea.

The object of the bill is to authorize the provinces to permit the conduct of sweepstakes in their territories, not by any group of citizens, but only by a committee authorized by the attorney-general, who would direct the scheme. The money would be devoted to the welfare of the sick, the destitute and the maimed.

The bill expressly forbids the advertising of a sweepstake outside the province in which it is being conducted and the appointment of agents for the sale of tickets outside the province.

Senator MacRae said in 1931, the Irish hospitals received from the three sweepstakes, more than £2,000,000.

In 1932, according to a cable he received recently from Ireland three sweepstakes had gross receipts of £11,000,000. They gave away in prizes £7,000,000 and the expenses were £1,000,000.

As to the moral question involved, the churches in Ireland had voiced no disapproval of the holding of sweepstakes. After all church bazaars were the same thing on a small scale.

Senator MacRae outlined the serious situation of the hospitals and other charitable institutions in Canada. The Vancouver hospital had received £750,000 to the Irish, and had no money to pay it. Other institutions were in like predicament. He closed with an urgent plea for the passage of his bill.

MAY DECIDE RAIL AMALGAMATION BY PLEBISCITE

Ottawa, Ont.—Canadian people at the next general election may have the opportunity to decide by plebiscite whether the Canadian National and Canadian Pacific Railways shall be amalgamated. Premier R. B. Bennett returned today in the House of Commons.

Amalgamation was guarded against in the government's railway legislation based on the report of the Duff commission on transportation, the Prime Minister said.

But the Canadian National was a bankrupt enterprise, eating into the (monies) vaults of the country. The purpose of establishing a board of three trustees to manage the government road was to set up a receivership with wide and extraordinary powers in an effort to put it back on its feet.

"There is no thought of any trick to bring about something to which we have pledged ourselves not to do," said Mr. Bennett, referring to amalgamation. Conservatives and Liberals pounded their desks.

The large crowd in the gallery shuffled in their seats in mute applause. "There is no sinister design behind this investigation and this system with parliament in opposition to it. In my opinion it would be impossible to bring about the amalgamation of the railways on a permanent or conditional unless the people themselves had the opportunity to do so. I have given much thought to the people to determine whether or not they are desirous this should happen."

Shipping Bill Introduced

To Be Studied By Committee On Shipping and Commerce

Ottawa, Ont.—One of the largest single pieces of legislation to come before parliament in years was introduced in the senate when Rt. Hon. Arthur Meighen, government leader, sponsored the new shipping bill.

Containing more than 800 sections the bill will consolidate and modernize Canadian shipping legislation and will take the place of the part of the Imperial Shipping Act which now has effect in Canada.

Although Canadian-owned ships and tonnage are completely exempt from the Canadian-made law of the empire's mercantile marine fleet will be preserved. Canadian ships will be called "British ships of Canadian registry."

The bill was given first reading by the senate and will be studied by the committee on shipping and commerce.

Prior to the passing of the statute of Westminster, defining the complete legislative independence of the Dominion, Canadian ships outside Canadian territorial waters operated under laws enacted by the parliament of the United Kingdom.

May Reduce Number Of Police Magistrates

Alberta Has Lowered Appropriation As A Matter Of Economy

Edmonton, Alberta.—Estimates introduced in the Alberta legislature for the attorney-general's department show a reduction of \$13,708 compared to last year's figure and it is understood a reduction in the number of police magistrates in the province is planned by the government.

The appropriation for police magistrates dropped from \$62,250 to \$48,542. Attorney-General J. A. Lynn said it might be necessary to place some magistrates "on a furlough" as a means of reducing the number employed.

Ready To Leave League

Tokyo, Japan.—The cabinet approved and sent to the privy council the draft of a communication in which Japan is expected to notify the League of Nations about its withdrawal from that international body.

Soviets Telling No Part

Moscow, Russia.—The Soviet government has refused to participate in the League of Nations consultative commission which is to deal with the China-Japanese conflict. The reason ascribed was the "hostility" of the major participants toward the Soviet administration.

Our photograph shows Lord Lovat in a happy mood at the Stoopchance meeting near Chipping Norton, just before his son, Simon Christopher, master of Lovat (right), left him to ride in one of the races. When the young man returned after the race to spend his first night in the castle (in the background) Lord Lovat came to the ground and then died.

ADVERTISING RATES

Transient Advertising, per line... 50c
Reading Notices, per count line... 10c
Local Advertising, 15c per count line
First insertion and 10c per count line each subsequent insertion.
Notices of entertainments, meetings, sales, etc., at which admission is charged, articles sold, or collection taken, with the exception of actual church services, will be charged for at the regular advertising rates.

All advertising changes of copy must be in the hands of the printers by noon on Tuesday, or no changes can be made or ads discontinued.

Paper does not press Wednesday afternoon each week.

EDOUARD J. ROULEAU,
Editor and Publisher

TOWN & COUNTY
Personalographs

LOST—Small, dark, female police dog. Answers to name "Bonnie." Initials on collar R.L.T.—Reward, Bert. Trichter, Swallow.

Children's services and Sunday school will be held in the Anglican church on March 19th, at 10 a.m.

George McNeill was a business visitor in Carbon on Wednesday.

During Lent, services will be held in the Anglican Church every Thursday evening at 8 o'clock.

Mr. and Mrs. J. Willson spent a few days last week visiting with Mr. Willson's brother and sister-in-law, Mr. and Mrs. H. C. Willson.

As we sit at the Linotype setting type for this week's edition, we hear a fly

buzzing on the window—this is a sign of spring. Then glancing out of the window we see no trace of snow—this also is a good sign that spring is here. But when we went home at noon and found that the kids had been in mud up to their knees, we were convinced that spring had arrived.

TRADE OR SELL—Three brood female turkey gobblers, weights 22-25 lbs. for chickens, or cash. Mrs. T. J. Ramsay

Mr. Colin McPherson left on Saturday for the East, where he will reside in future.

Jack Spence is holidaying and left on Wednesday for a short visit with his folks.

Alex Sobyski left on Tuesday for his old home in Poland, and will be away for three or four months.

Mr. and Mrs. R. F. Torrance returned the first of the week after spending a few days in Edmonton.

Mr. and Mrs. H. C. Willson were Calgary visitors on Monday.

—Do you owe any accounts at The Carbon Chronicle office? If so, we would appreciate an early settlement.

Never stand on your dignity. There's nothing in the world so slippery.

The worst kind of exercise is jumping at conclusions.

Burn: I see by the papers that Mary left town after a short stop.

Dum: She always was nuts about both players.

Snicklefrizt ----

Everything has its good points. Taking a deep breath for a long time develops a girl's lungs.

Canadianism—Poking fun at women drivers; keeping quiet while your wife talks to the traffic cop.

Common sense is not so modern but it gets there just the same.

Widow's Inscription on husband's tombstone: "Rest in peace—until we meet again."

Some girls are so cold that they get warmed up when they drink ice water.

Teacher: Willie, do you know what becomes of the boys who use bad language when they're playing marbles? Willie: Yes, Miss. They grow up and play golf.

CARBON TRADING CO.**WANT ADS. GET RESULTS****Let Us Do Your Printing?**

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT

The Carbon Chronicle

A 115-Year-Old
CANADIAN INSTITUTION
That Is Still Young

The strength of Canada is in her youthful, pioneering, ever forward-facing, courageous spirit, tempered with old wisdom. Canada's strength is the composite strength of her constituents—institutions as well as individuals.

The Bank of Montreal, 115 years old and true to Canadian history and tradition, applies its experience and adjusts its service constantly to changing conditions, to the end that it may provide safe, helpful and convenient banking for the people and business of the Dominion.

Carbon Branch: R. J. FAIRBAIRN, Manager

Sir James Crichton-Browne
pre-eminent in the British
Medical World, Declares:—

"Beer---our national beverage --- is the most truly nourishing of alcoholic drinks, and its use in moderation is well calculated to decrease susceptibility to fatigue and the headaches and dependency of those who are over-wrought and worried. Beer is not only a readily assimilable food, but it promotes the assimilation of other foods."
